9.2 — Project 3.1: Create SMPS document

What?

The CFO wants to keep tracking the profitability of the company. He requested a prediction of the future focused on 2020 consumer loan revenue.

Why?

Bringing profitability to the stakeholders working to achieve goals set by the management group by the prediction realized for BI team.

How?

Forecasts will be estimating future revenues based on the performance shown in database with the historic performances during those times bringing insights using Microsoft Power BI (Visualization).

Data

- Using all data and tables of Microsoft SQL Server

Tools

- SQL Server as the backend database.

- SQL Server Management Studio for backend and middle tier (business logic) development

- GitHub for code repository

- Microsoft Power BI (Visualization)
